

# Instruction for SP60 RGB Spot Light

Connect as many SP60 spot lights as your needs with the cable (diagram is shown below), two yellow wires connect with AC12V traditional transformer, green wire connect to green wire, black wire connect to black wire.

(!!**Notice!!**) the red wire of the IR signal generator could only be connected to one of the SP60 spot lights, rest of the red wire of other spot lights can't be connected.
